

AI MASTERCLASS.

19 April 2026

INDEX

Yahan milega tumhe sabse best AI tools ka breakdown — English + Hinglish mein!

01	AI Presentation & Visual Design Tools	4
02	AI Website Building Tools	7
03	AI Image Generation Tools	11
04	AI Video Generation Tools	17
05	AI Audio Generation Tools	23
06	AI Coding Assistants	26
07	AI Research & Productivity Tools	29
08	Bonus & Emerging AI Tools	32
09	Free Tools Quick-Reference List	35

How to Use This Resource / Kaise Use Karein: Har tool ka description English aur Hinglish dono mein diya gaya hai. Pricing tab ki hai jab ye PDF publish hua — always check official sites for updates.

01 — AI Presentation & Visual Design Tools

Ye tools tumhari boring text ko stunning presentations aur visuals mein convert kar dete hain — designer hire karne ki zaroorat nahi!

Napkin AI

Napkin AI converts plain text into beautiful diagrams, flowcharts, and infographics instantly. Just paste your text and it auto-generates the visual — ideal for business storytelling and education.

"Text paste karo, visual ban jaata hai — no design skills needed! Perfect for presentations aur decks."

■ PROS

- ✓ Extremely easy to use — just paste text and visuals appear
- ✓ Great customisation of colours and styles
- ✓ Free during beta period — full features at zero cost
- ✓ Integrates as a document editor for visuals

■■ CONS

- ✗ Limited template variety — certain visual styles only
- ✗ Struggles with unstructured or vague text inputs
- ✗ Some advanced features (offline use, complex editing) still missing

■ PRICING

Free during beta (2025) — Starter: up to 3 visuals free. Professional features also free in beta. Post-beta plans expected ~$8/month per user.

Abhi ke liye bilkul FREE hai beta mein — baad mein ~$8/month ho sakta hai.

■ USE CASES

Creating quick infographics for pitch decks, educators turning lesson notes into visual explainers, business teams visualising processes without a graphic designer.

■ Official Site: napkin.ai

Gamma

Gamma is an AI-powered tool for generating complete slide decks, documents, and web pages from a simple prompt or outline. It produces polished presentations with AI-generated text and images.

"Ek prompt likho aur poori presentation ready ho jaati hai — ChatGPT jaisa but slides ke liye!"

■ PROS

- ✓ Prompt-based deck creation — describe it, Gamma builds it
- ✓ Flexible output: presentations, PDFs, websites all in one
- ✓ Real-time collaboration and AI-assisted refinement
- ✓ Supports interactive elements and animations

■■ CONS

- ✗ Free plan gives only 400 AI credits (one-time, doesn't renew)
- ✗ Advanced image models locked behind paid plans
- ✗ Cannot edit presentations offline — internet required

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PRICING

Free plan: 400 AI credits (one-time). Paid — Plus: $10/month (unlimited AI gen, custom branding), Pro: $20/month (advanced image models, 60 slides/deck). Annual billing discounts available.

Free mein 400 credits milte hain. Plus plan $10/month mein unlimited generation deta hai.

■ USE CASES

Quickly drafting pitch decks, project proposals, reports. Non-designers can create slides just by describing content. Great for startups, teachers, and founders.

■ Official Site: gamma.app

Tome AI

Tome is an AI-native presentation tool focused on narrative-driven storytelling. It combines text, images, videos, and data into beautiful one-scroll documents and presentations.

"Yeh sirf slides nahi banata — ek poori kahani create karta hai. Scrollable format mein."

■ PROS

- ✓ Unique narrative format — more like a story than a slideshow
- ✓ AI generates both content and layout simultaneously
- ✓ Embeds live data, videos, Figma prototypes, and 3D models
- ✓ Clean, minimal design output that looks professional instantly

■■ CONS

- ✗ Less control over individual slide layout vs. Gamma
- ✗ Not ideal for traditional corporate presentations
- ✗ Free plan limited to 500 AI credits

■ PRICING

Free: 500 AI credits. Pro: $20/month — unlimited AI creation, custom domain, analytics, white-label options for agencies.

Free mein start kar sakte ho. Pro $20/month mein unlimited creativity milti hai.

■ USE CASES

Startup pitch narratives, product launches, portfolios, and any presentation where you want a story-first format rather than bullet-point slides.

■ Official Site: tome.app

■ Quick Comparison / Comparison Table

Tool	Best For	Free Tier	Starting Price	Output Format
Napkin AI	Text→Diagrams	Yes (beta)	~$8/mo	Infographics, Charts
Gamma	Slide Decks	400 credits	$10/mo	Slides, PDF, Website
Tome AI	Story Narratives	500 credits	$20/mo	Scrollable Docs

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

02 — AI Website Building Tools

Ab website banana itna easy ho gaya hai — bolo aur website ban jaati hai! No coding required (mostly).

Framer AI

Framer is a professional web design tool with an AI website builder. Input a description and Framer creates a multi-page responsive website in seconds — with hosting included.

"Design aur hosting dono ek jagah. Sirf describe karo apni website — Framer bana dega!"

■ PROS

- ✓ Easy visual editor — more intuitive than WordPress/Wix
- ✓ AI generates copy in your brand voice automatically
- ✓ Supports animations, interactions, SEO-optimised by default
- ✓ Free Forever tier available for personal sites

■■ CONS

- ✗ Not suitable for backend logic or complex web apps
- ✗ Design interface similar to Figma — beginners may face learning curve
- ✗ Custom domain requires paid plan

■ PRICING

Free: Framer subdomain, 1,000 visitors/month. Paid per site — Mini: ~$5/mo, Basic: ~$15/mo (150 pages), Pro: ~$25/mo (300 pages). All paid plans remove branding.

Personal site ke liye free hai. Business ke liye ~$15/month se shuru.

■ USE CASES

Landing pages, portfolios, marketing sites, startup websites — anyone who needs a sleek site without hiring a developer.

■ Official Site: framer.com

Bolt.new

Bolt.new by StackBlitz is a revolutionary AI coding environment that builds full web applications from a single prompt — frontend, backend, and database — all running in the browser.

"Sirf ek prompt likho aur poora app ban jaata hai — frontend se lekar backend tak! Bhai, yeh magic hai."

■ PROS

- ✓ Builds complete full-stack apps from a single prompt
- ✓ Real browser-based development environment (no setup)
- ✓ Supports React, Vue, Svelte, Node.js, and more
- ✓ One-click deployment to production

■■ CONS

- ✗ Complex apps may require multiple iterations and corrections
- ✗ Free tier has limited tokens per day
- ✗ Generated code needs review before production use

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PRICING
Free: limited daily tokens. Pro: ~$20/month for 10M tokens. Teams plan available for agencies.

Free mein try karo. Serious use ke liye $20/month — bohot value hai paise ke hisaab se.

■ USE CASES
Building MVPs quickly, prototyping startup ideas, creating internal tools, and for non-developers who want to build web apps without coding.

■ Official Site: bolt.new

10Web AI Builder

10Web is an AI-assisted WordPress site builder and hosting platform. It can recreate any website from a URL or generate a new WordPress site from prompts.

"Kisi bhi website ka clone ek click mein! WordPress ki power + AI ki speed."

■ PROS
- ✓ Full WordPress CMS after AI generates the initial site
- ✓ AI Recreation Assistant can clone any website's design
- ✓ Built-in SEO tools and performance optimisation
- ✓ eCommerce support with WooCommerce integration

■■ CONS
- ✗ AI generation can produce technical errors needing manual fixes
- ✗ Monthly subscription includes hosting — not a standalone builder
- ✗ Customisation limited to Elementor's offerings

■ PRICING
7-day free trial. Paid — AI Starter: ~$20/mo (or $10/mo annual). AI Premium: ~$30/mo. Agency plans available for multiple sites.

7 din free try karo. Phir $10-20/month mein apni WordPress site chalaao.

■ USE CASES
Small businesses needing a professional website quickly, agencies spinning up client sites, blogs, and eCommerce stores.

■ Official Site: 10web.io

Durable AI

Durable claims to build a complete business website in 30 seconds using AI. Just enter your business type and location — it generates a full site with copy, images, and contact forms.

"30 second mein website! Seriously — sirf business type batao aur site ready."

■ PROS
- ✓ Fastest AI website builder — 30-second generation
- ✓ Includes AI-generated copy, images, and CRM tools
- ✓ Built-in invoice generator and client management
- ✓ Great for local businesses and freelancers

■■ CONS
- ✗ Very limited design customisation options
- ✗ Not suitable for complex or custom websites
- ✗ AI-generated content can be generic — needs personalisation

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PRICING

Free to generate and preview. Paid: ~$12/month (Starter) for custom domain and publishing. Business plan ~$20/month includes CRM, invoicing.

Generate karo free mein. Domain aur live karne ke liye $12/month.

■ USE CASES

Local businesses, freelancers, service providers who need a quick professional online presence without any technical knowledge.

■ Official Site: durable.co

■ Quick Comparison

Tool	Best For	Speed	Free Tier	Price/mo
Framer AI	Design + Portfolio	Minutes	Yes (subdomain)	~$15
Bolt.new	Full-Stack Apps	Minutes	Yes (limited)	~$20
10Web	WordPress Sites	Minutes	7-day trial	~$20
Durable AI	Business Sites	30 seconds	Preview only	~$12

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

03 — AI Image Generation Tools

Text likho, image ban jaao! Ye tools text prompts se photorealistic aur artistic images generate karte hain. 2025 mein image gen ka level bohot zyada upgrade ho gaya hai.

DALL-E 3 / GPT-4o Image Generation

DALL-E 3 is OpenAI's latest image model, now fully integrated into ChatGPT and GPT-4o. It excels at understanding detailed prompts and creates high-quality illustrations and realistic images.

"ChatGPT mein type karo kya chahiye — aur image ban jaati hai. Simplest way to generate images!"

■ PROS

- ✓ Extremely easy via ChatGPT — no separate app needed
- ✓ Excellent at understanding complex, nuanced prompts
- ✓ Images are yours to use commercially (great rights policy)
- ✓ GPT-4o can now edit and iterate on images conversationally

■■ CONS

- ✗ Strict content filters — no real people, no violence, no political content
- ✗ Style leans more illustrative than photorealistic by default
- ✗ No standalone DALL-E 3 interface outside ChatGPT/Bing

■ PRICING

Free via Bing Image Creator (unlimited, Microsoft account). Within ChatGPT: included in $20/month Plus subscription. GPT-4o image gen: included in Plus.

Bing par free mein use karo. ChatGPT Plus $20/month mein unlimited image generation milti hai.

■ USE CASES

Quick concept art, blog illustrations, product mockups, storybook images, marketing material ideation — best for beginners and casual creators.

■ Official Site: openai.com / bing.com/images

Midjourney v7

Midjourney remains the gold standard for AI image quality. v6.1 produces photorealistic portraits, cinematic landscapes, and artistic illustrations with stunning detail and consistency.

"Agar quality mein koi compromise nahi karni toh Midjourney hi use karo — best results guarantee."

■ PROS

- ✓ Best photorealism and artistic quality of any consumer tool
- ✓ Character consistency across images (v6 feature)
- ✓ Zoom Out, Pan, and Vary Region for powerful editing
- ✓ Huge community on Discord with infinite prompt inspiration

■■ CONS

- ✗ No free tier — subscription required
- ✗ Discord-based interface can be confusing for beginners
- ✗ Achieving specific styles requires prompt engineering skill
- ✗ Moderate content filters still apply

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PRICING
No free plan. Basic: $10/mo (200 images). Standard: $30/mo (~900 images + relaxed mode). Pro: $60/mo (stealth mode). Mega: $120/mo. Annual billing = ~20% off.

Koi free plan nahi hai. Basic $10/month se start hota hai — artists ke liye best investment.

■ USE CASES
Professional concept art, album covers, advertising visuals, portraits, fantasy illustrations — whenever top-tier visual quality is non-negotiable.

■ Official Site: midjourney.com

Leonardo AI

Leonardo.ai is a versatile image platform with multiple AI models for different styles — from photorealism to anime. Originally built for game assets, now used by all creators.

"Multiple models, maximum control — aur free mein bhi kaafi kuch milta hai roz!"

■ PROS
- ✓ 150 free tokens every 24 hours — renews daily (most generous free tier)
- ✓ Many AI models to choose from: anime, photography, concept art
- ✓ Strong prompt fidelity — outputs match descriptions closely
- ✓ Basic video/animation tools included

■■ CONS
- ✗ Interface can overwhelm beginners with too many settings
- ✗ Advanced features (high-res upscaling) require paid plan
- ✗ Achieving ultra-photorealism needs specific model selection

■ PRICING
Comprehensive free plan: 150 tokens/24hrs (~15 images/day). Paid from $10/month (Standard) — 700 monthly credits + 30 daily refill, no watermark, priority processing.

Free mein roz 15 images bana sakte ho! $10/month mein aur zyada milta hai.

■ USE CASES
Artists, game designers, content creators needing daily image generation. Great for specific art styles and when you have a very precise image in mind.

■ Official Site: leonardo.ai

Ideogram 2.0

Ideogram specialises in generating images with accurate, readable text — something most AI image generators struggle with. v2.0 produces stunning posters, logos, and typographic designs.

"Posters, logos, aur images mein TEXT accurate likhna ho? Ideogram best hai — dusre tools yeh nahi kar paate!"

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PROS

- ✓ Best-in-class text rendering within images — readable and accurate
- ✓ Excellent for poster design, social media graphics, logo concepts
- ✓ Realistic and illustrative modes both work well
- ✓ Free tier is genuinely usable for daily creation

■■ CONS

- ✗ Not the best for photorealistic human faces
- ✗ Less variety in artistic styles compared to Leonardo or Midjourney
- ✗ Community and model ecosystem smaller than competitors

■ PRICING

Free: 10 slow generations/day. Basic: $7/month (400 priority credits). Plus: $16/month (1,000 credits). Pro: $48/month (3,000 credits).

Free mein 10 images/day milti hain. Serious use ke liye $7/month kaafi affordable hai.

■ USE CASES

Social media posts with text overlays, posters, flyers, logo ideation, book covers, typographic art — any image that needs readable text embedded.

■ Official Site: ideogram.ai

Adobe Firefly 3

Adobe Firefly 3 is Adobe's generative AI engine fully integrated into Photoshop, Illustrator, and Premiere Pro. Generative Fill, Generative Expand, and text-to-image all work within CC apps.

"Photoshop users ke liye yeh game-changer hai — AI directly apne design workflow mein milta hai."

■ PROS

- ✓ Seamlessly integrated into Photoshop, Illustrator, Premiere Pro
- ✓ Generative Fill and Expand are revolutionary for photo editing
- ✓ Commercial use safe — Adobe provides IP indemnification
- ✓ Great for extending images, removing objects, style transfers

■■ CONS

- ✗ Image generation quality not as strong as Midjourney/Leonardo
- ✗ Heavily tied to Adobe subscription ecosystem
- ✗ Free plan gives only ~25 credits/month

■ PRICING

Included with Creative Cloud plans. Free web tier: ~25 credits/month (watermarked). Firefly Premium: ~$4.99/month for 100 credits. CC subscribers get monthly credits.

Adobe CC users ke liye practically free hai. Otherwise $4.99/month mein 100 credits.

■ USE CASES

Graphic designers extending image backgrounds, removing objects, creating marketing graphics — anyone already working inside Adobe apps.

■ Official Site: firefly.adobe.com

Flux by Black Forest Labs

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

Flux is an open-source image generation model by Black Forest Labs (former Stable Diffusion team). Flux.1 [dev] and [schnell] variants offer state-of-the-art quality, especially for photorealism.

"Open source world ka sabse powerful image model — Stable Diffusion team ne banaya hai yeh!"

■ PROS

- ✓ State-of-the-art photorealism — rivals Midjourney in quality
- ✓ Open source — can be run locally for free with proper hardware
- ✓ Available on many platforms: Replicate, fal.ai, ComfyUI
- ✓ Excellent prompt adherence and image diversity

■■ CONS

- ✗ Running locally requires powerful GPU (16GB+ VRAM recommended)
- ✗ Technical setup needed for local use
- ✗ Cloud-based API usage costs per generation

■ PRICING

Open source — free to run locally (needs powerful GPU). Cloud APIs: Replicate/fal.ai ~$0.003-$0.05 per image. Available on many third-party platforms.

GPU waalon ke liye bilkul free. Cloud APIs mein per-image cost lagta hai.

■ USE CASES

Power users and developers wanting maximum image quality, anyone running local AI setups, researchers, and those building image-generation applications.

■ **Official Site:** blackforestlabs.ai

■ Quick Comparison

Tool	Best For	Free Tier	Photorealism	Price/mo
DALL-E 3	Easy Beginners	Bing (free)	Good	In ChatGPT $20
Midjourney v6	Max Quality	No	Excellent	$10+
Leonardo AI	Daily Creation	~15 imgs/day	Very Good	$10
Ideogram 2.0	Text in Images	10/day	Good	$7
Adobe Firefly	Adobe Users	25 cr/mo	Good	In CC plan
Flux	Power Users	Local GPU	Excellent	API pricing

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

04 — AI Video Generation Tools

Text likh■ ya image upload karo — AI ek video bana dega! Yeh field 2025 mein sabse tezi se grow ho raha hai. Sab kuch experimental hai but results dekh ke dimag hil jaata hai.

Sora by OpenAI

Sora is OpenAI's text-to-video model generating 5-20 second clips with remarkable coherence. Now available via ChatGPT Pro and Plus, it handles complex multi-character scenes.

"OpenAI ka video generator — ek prompt se 20 second ka cinematic video! Quality dekh ke hairan ho jaoge."

■ PROS

- ✓ Highest quality output among text-to-video tools
- ✓ Handles complex scenes with multiple characters and camera movements
- ✓ Specify camera moves in prompt (aerial pan, dolly shot, etc.)
- ✓ Integrated into ChatGPT Plus and Pro — no separate signup

■■ CONS

- ✗ Video quality can have occasional physics glitches
- ✗ Very short clips (max ~20 seconds currently)
- ✗ Available only to Plus ($20/mo) and Pro ($200/mo) subscribers
- ✗ Generation can take several minutes

■ PRICING

Included in ChatGPT Plus ($20/month) with limited generations. ChatGPT Pro ($200/month) gives priority access and more generations.

ChatGPT Plus $20/month mein milta hai. Pro users ko $200/month mein priority access.

■ USE CASES

Short cinematic clips, concept videos for films/games, social media content, storyboarding, and visual prototypes for ad campaigns.

■ Official Site: sora.com (via ChatGPT)

Kling AI 3.0

Kling by Kuaishou has emerged as one of the best video generators — nearly matching Sora in quality at a fraction of the cost. v1.6 features improved motion quality and lip-sync.

"Sora jaisi quality, kam price mein! Chinese company ka tool hai but results international level ke hain."

■ PROS

- ✓ High prompt accuracy — outputs closely match descriptions
- ✓ Motion brush for precise movement control in videos
- ✓ Lip-sync feature for character dialogue
- ✓ Free tier with daily credits available

■■ CONS

- ✗ Generation can take 5-15 minutes per clip
- ✗ Style bias towards East Asian aesthetics in some outputs
- ✗ English documentation and support can be limited

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PRICING

Free: ~66 credits/day (~1 short clip). Standard: ~$10/mo (660 credits). Pro: $37/mo (3,000 credits). Premier: $92/mo (8,000 credits).

Free mein ek video roz bana sakte ho. Serious creators ke liye $10/month kaafi hai.

■ USE CASES

Social media content, AI-driven character videos, virtual influencers, product demonstrations, and directed video scenes with specific motion requirements.

■ Official Site: klingai.com

Luma Dream Machine

Luma Dream Machine is known for producing videos with the most realistic physics simulation and smooth, natural motion. Particularly strong at turning images into dynamic videos.

"Physics aur motion ke liye best hai — paani, aag, kapda — sab realistic lagta hai!"

■ PROS

- ✓ Best physics simulation in AI video — water, cloth, fire all look real
- ✓ Excellent image-to-video conversion quality
- ✓ Fast generation (2-4 minutes for 5-second clip)
- ✓ Clean web interface — easy to use

■■ CONS

- ✗ Weaker at prompt adherence for very specific scene compositions
- ✗ Free tier quite limited (limited daily generations)
- ✗ Style can feel slightly dreamy/cinematic — not always photorealistic

■ PRICING

Free: limited daily generations (about 5/day). Pro: $29.99/month (100 generations). Plus: $99.99/month (400 generations). Business plans available.

Free mein 5 videos/day try karo. Pro $30/month mein 100 videos milti hain.

■ USE CASES

Product videos with realistic material properties, nature videos, image animation, and any video where physical realism is important.

■ Official Site: lumalabs.ai

Veo 2 by Google DeepMind

Veo 2 is Google DeepMind's state-of-the-art video generation model producing 1080p, multi-minute videos with excellent camera control and cinematic understanding.

"Google ka latest video AI — 1080p quality, multiple minutes, aur cinematic camera control!"

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PROS

- ✓ Generates up to 2-minute videos — longest duration available
- ✓ 1080p resolution output — highest quality available
- ✓ Understands cinematic terminology (Dutch angle, rack focus, etc.)
- ✓ Available via Google VideoFX and Vertex AI

■■ CONS

- ✗ Access still limited — available through Google Labs waitlist
- ✗ Not a consumer product yet — primarily enterprise via Vertex AI
- ✗ Pricing via Vertex AI can be expensive for heavy usage

■ PRICING

Google VideoFX: free preview via Google Labs (limited access). Enterprise: via Google Vertex AI — usage-based pricing ($0.35 per second of generated video approximately).

Google Labs par free preview available hai. Enterprise ke liye Vertex AI pricing.

■ USE CASES

Professional film production prototyping, high-quality advertising content, enterprise-level video production pipelines, and premium social media content.

■ Official Site: deepmind.google/veo

Runway Gen-3 Alpha

Runway Gen-3 Alpha is a significant upgrade from Gen-2, producing more consistent, higher-quality text-to-video and image-to-video with better motion and realism.

"Gen-2 se kaafi better hai yeh — motion realistic hai aur creative effects ke liye best hai."

■ PROS

- ✓ Integrated video editor with AI effects, background removal, and compositing
- ✓ Multi-Motion Brush for element-specific movement control
- ✓ Pioneer in the field — most mature platform and ecosystem
- ✓ Text-to-video and video-to-video both available

■■ CONS

- ✗ Visual quality still slightly behind Kling/Sora for photorealism
- ✗ Credit system can get expensive for heavy users
- ✗ Short clip duration limit (10-16 seconds per generation)

■ PRICING

Free: 125 one-time credits. Standard: $12/user/month (625 credits). Pro: $28/month (2,250 credits). Unlimited: $100/month.

Free mein 125 credits milte hain ek baar. Phir $12/month se paid plan.

■ USE CASES

Film pre-visualization, abstract artistic videos, VFX prototyping, content creators needing AI-powered video editing effects.

■ Official Site: runwayml.com

Hailuo AI (MiniMax Video)

Hailuo AI (now also known as MiniMax Video) offers one of the most generous free tiers in text-to-video — 100 free credits daily, making it perfect for learning and experimentation.

"Beginners ke liye best hai — roz 100 free credits milte hain, kaafi videos bana sakte ho!"

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PROS

- ✓ 1,000 credits on signup + 100 free credits every day
- ✓ Fast generation (~30 seconds per 6-second clip)
- ✓ Good prompt adherence for scene composition
- ✓ 720p quality at 25 FPS — good for social media

■■ CONS

- ✗ Videos max 6 seconds — short duration limitation
- ✗ Occasional physics artifacts and jitter
- ✗ Quality not production-ready — clearly AI-generated

■ PRICING

Free: 100 credits/day (~3 videos). Paid plans available for more credits and higher resolution. MiniMax API available for developers.

Free mein roz 3 videos bana sakte ho! Beginners ke liye yeh best starting point hai.

■ USE CASES

Beginners experimenting with AI video, social media snippets, quick concept videos, hobbyists learning the technology.

■ Official Site: hailuoai.video

■ Quick Comparison

Tool	Max Duration	Quality	Free Tier	Best For
Sora	~20 sec	Excellent	ChatGPT Plus	Cinematic clips
Kling 1.6	~30 sec	Excellent	~1 clip/day	Directed scenes
Luma Dream Machine	~5 sec	Very Good	5/day	Physics realism
Veo 2 (Google)	~2 min	Excellent	Limited Labs	Enterprise/Pro
Runway Gen-3	~16 sec	Good	125 (once)	Creative effects
Hailuo AI	~6 sec	Average	~3/day	Beginners

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

05 — AI Audio Generation Tools

AI sirf text aur images nahi — music, voice, aur sound bhi generate karta hai! Content creators ke liye yeh tools goldmine hain.

Suno AI v4

Suno AI is the leading platform for generating full songs with vocals from text prompts. v4 produces songs up to 4 minutes with significantly improved vocal clarity and production quality.

"Ek prompt likho aur poora gaana ban jaata hai — vocals, music, sab kuch! Bollywood style bhi kar sakte ho."

■ PROS

- ✓ Generates realistic songs with instruments + vocals in minutes
- ✓ Supports all genres — pop, Bollywood, classical, hip-hop, EDM
- ✓ Free tier: 50 credits/day (~10 songs daily) — very generous
- ✓ v4 improved vocal clarity and music production quality significantly

■■ CONS

- ✗ All songs have a similar 'autotuned' vocal style across outputs
- ✗ Free tier outputs not licensed for commercial use
- ✗ Lyrics can be generic unless you provide specific custom lyrics

■ PRICING

Free: ~50 credits/day (~10 songs/day). Pro: $10/month (2,500 credits, commercial rights). Premier: $30/month (10,000 credits). Commercial use requires paid plan.

Free mein 10 songs/day. Commercial use ke liye $10/month mein Pro plan lo.

■ USE CASES

Background music for videos, custom birthday/celebration songs, music prototyping, overcoming creative block, jingle creation for ads and content.

■ Official Site: suno.ai

Udio

Udio is Suno's main competitor, known for producing music with more diverse vocal styles and better instrument separation. It handles genre-mixing particularly well.

"Suno ka competitor — yahan zyada variety milti hai vocals mein. Genre mixing bohot badhiya karta hai."

■ PROS

- ✓ More vocal variety than Suno — different voice characteristics available
- ✓ Better instrument separation and mixing quality
- ✓ Excellent genre-blending capabilities
- ✓ Free tier available with 100 credits monthly

■■ CONS

- ✗ Free tier more limited than Suno (100 credits/month vs daily)
- ✗ Commercial rights require paid plan
- ✗ Some genres produce inconsistent quality

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PRICING

Free: 100 credits/month (~50 songs). Standard: $10/month (1,200 credits/month). Pro: $30/month (4,800 credits). Commercial license on all paid plans.

Free mein 50 songs/month. Paid plans $10/month se start hote hain.

■ USE CASES

Music creators wanting different vocal styles, genre experimentation, music for ads, podcasts, YouTube videos, and games.

■ Official Site: udio.com

ElevenLabs

ElevenLabs is the gold standard for AI voice synthesis. It produces ultra-realistic speech, supports voice cloning, multilingual output, and is used by major studios and content creators.

"Agar realistic voice chahiye toh ElevenLabs — koi competitor nahi hai quality mein. Voice clone bhi kar sakte ho apni!"

■ PROS

- ✓ Most realistic AI voices available — nearly indistinguishable from human
- ✓ Voice cloning: upload 1-min audio sample, get your AI voice
- ✓ Supports 29+ languages including Hindi
- ✓ Widely used by Netflix, major studios, and creators worldwide

■■ CONS

- ✗ Free tier very limited: 10,000 characters/month (~5 minutes audio)
- ✗ Expensive for long-form content generation
- ✗ Cloning celebrity/third-party voices without permission violates terms

■ PRICING

Free: 10,000 characters/month (~5 min). Starter: $5/month (30,000 chars). Creator: $22/month (100,000 chars). Pro: $99/month (500,000 chars).

Free mein 5 min audio. Creator plan $22/month mein ~1 ghante ki audio ban sakti hai.

■ USE CASES

YouTube narration, audiobooks, podcast production, voice cloning, game NPC voices, multilingual dubbing, and accessibility features.

■ Official Site: elevenlabs.io

NotebookLM Audio Overviews

Google's NotebookLM can generate realistic two-host podcast-style audio discussions from your uploaded documents, PDFs, and notes — completely automatically.

"Apna PDF upload karo, aur NotebookLM usse ek podcast bana dega — do log baat karte hue! Mind-blowing!"

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PROS

- ✓ Generates realistic two-host podcast discussions from your content
- ✓ Completely free with a Google account
- ✓ Handles complex technical content surprisingly well
- ✓ Great for studying — listen to your notes while commuting

■■ CONS

- ✗ Audio output only — cannot be customised (voices, pacing are fixed)
- ✗ English-only for audio overviews currently
- ✗ No control over conversation structure or specific points covered

■ PRICING

Completely free with Google account. NotebookLM Plus included in Google One AI Premium at $19.99/month for higher usage limits.

Google account se bilkul free! AI podcast apne notes se — yeh feature alone bohot value deta hai.

■ USE CASES

Students converting study notes to audio, professionals reviewing reports on commute, researchers getting quick summaries of academic papers.

06 — AI Coding Assistants

Coding seekhni hai ya speed badhaani hai? Ye AI coding tools tumhare development ko 10x faster bana dete hain. Non-coders ke liye bhi options hain!

Cursor AI

Cursor is an AI-native code editor that understands your entire codebase and can write, refactor, debug, and explain code using natural language instructions.

"VS Code jaisa editor hai, lekin AI andar baith ke sab kuch samajhta hai — ek jagah se poora project manage hota hai."

■ PROS

- ✓ Takes context from your entire codebase — not just current file
- ✓ Can update multiple files simultaneously for a single change
- ✓ Natural language instructions: 'refactor this for efficiency'
- ✓ UI familiar to VS Code users — minimal learning curve
- ✓ Dramatically increases developer productivity

■■ CONS

- ✗ AI output needs review — can produce incorrect logic
- ✗ Sends code to external AI servers (privacy consideration)
- ✗ Some developers prefer their own highly customised environments

■ PRICING

Hobby plan: Free (2,000 completions, 50 slow premium requests/month). Pro: $20/month (unlimited completions, 500 fast requests). Business: $40/user/month.

Free mein 2000 completions milti hain. Pro ke liye $20/month — most developers ke liye enough hai.

■ USE CASES

All developers from beginners (learning code) to experts (large refactors, bug finding, documentation generation, test writing).

■ Official Site: cursor.com

GitHub Copilot

GitHub Copilot is the most widely used AI coding assistant, integrated directly into VS Code, JetBrains, and other major IDEs. Powered by OpenAI Codex/GPT-4.

"Developer world ka most popular AI tool — almost har company use karti hai yeh. IDE mein directly milta hai."

■ PROS

- ✓ Available in VS Code, JetBrains, Neovim, and many IDEs
- ✓ Copilot Chat for conversational coding help in the editor
- ✓ Code completion, generation, and explanation
- ✓ GitHub integration for PR descriptions, code review

■■ CONS

- ✗ Monthly subscription required — no meaningful free tier
- ✗ Less context-aware than Cursor (file-level, not full project)
- ✗ Suggestions can be repetitive for boilerplate tasks

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PRICING
Free: very limited. Individual: $10/month. Business: $19/user/month. Enterprise: $39/user/month with policy controls and audit logs.

Individual developers ke liye $10/month. Company ke through kharido toh $19/user/month.

■ USE CASES
Day-to-day code completion, writing tests, documentation, PR descriptions, and any professional developer workflow.

■ Official Site: github.com/copilot

Windsurf (by Codeium)

Windsurf is Codeium's AI code editor with 'Cascade' — a deeply agentic coding AI that can plan, execute, and iterate on complex multi-step coding tasks autonomously.

"Cursor ka strong competitor — Cascade feature mein AI khud soch ke plan banata hai aur execute karta hai!"

■ PROS
- ✓ Cascade: AI that can plan and execute multi-step tasks autonomously
- ✓ Reads entire codebase for full context (like Cursor)
- ✓ Free tier more generous than most competitors
- ✓ Flows — automated multi-agent workflows for complex tasks

■■ CONS
- ✗ Newer product — fewer community resources than Cursor/Copilot
- ✗ Complex autonomous actions need careful review
- ✗ Occasional context drift in very large codebases

■ PRICING
Free: 5 Flow action credits/day + unlimited completions. Pro: $15/month (unlimited flows, priority). Team: $35/user/month.

Free mein kaafi kuch milta hai. Pro $15/month mein — Cursor se $5 sasta hai!

■ USE CASES
Complex multi-file coding tasks, autonomous debugging, architecture planning, and developers who want more AI autonomy in their workflow.

■ Official Site: codeium.com/windsurf

Claude Code (by Anthropic)

Claude Code is Anthropic's terminal-based coding agent that can understand entire repositories, plan complex changes, and execute multi-file refactors with deep reasoning.

"Terminal se directly code likhwao — Claude poori repository samajhta hai aur complex changes karta hai."

■ PROS
- ✓ Exceptional reasoning for complex architectural decisions
- ✓ Understands full repository context including commit history
- ✓ Can autonomously explore, plan, and implement features
- ✓ Great for debugging complex issues requiring deep analysis

■■ CONS
- ✗ Terminal-based — not a visual IDE like Cursor or Windsurf
- ✗ API-based pricing can be expensive for heavy autonomous use
- ✗ Requires comfort with command-line interfaces

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PRICING

Usage-based via Anthropic API. Approx $3-15 per complex task depending on context size. Max plan Claude subscription ($100/mo) includes expanded API access.

Per task ke hisaab se charge hota hai. Complex tasks ke liye value for money hai.

■ USE CASES

Senior engineers working on complex codebases, refactoring large projects, autonomous bug investigation, and architecture-level changes.

07 — AI Research & Productivity Tools

Research, writing, aur daily work ko AI se supercharge karo. Ye tools tumhara time bachate hain aur output quality badhate hain.

Perplexity AI

Perplexity is an AI-powered answer engine that searches the web in real-time and provides cited, concise answers with sources — a smarter alternative to Google for research.

"Google ko bhool jao research ke liye — Perplexity web search karta hai aur sources bhi deta hai saath mein!"

■ PROS

- ✓ Real-time web search with cited sources — no hallucinations about current events
- ✓ Pro Search for complex multi-step research queries
- ✓ Spaces for organising research projects
- ✓ Available on iOS, Android, and web — syncs across devices

■■ CONS

- ✗ Pro features require paid subscription ($20/month)
- ✗ Less customisable than direct AI chat interfaces
- ✗ Can miss nuanced information requiring deep domain expertise

■ PRICING

Free: unlimited basic searches, 5 Pro searches/day. Pro: $20/month (unlimited Pro searches, image generation, API access).

Basic use bilkul free hai. Power users ke liye $20/month mein Pro plan lo.

■ USE CASES

Current events research, fact-checking, academic research, market analysis, and any task requiring up-to-date web information.

■ Official Site: perplexity.ai

NotebookLM

NotebookLM by Google lets you upload documents, PDFs, YouTube transcripts, and notes — then chat with your own material, generate summaries, flashcards, and audio overviews.

"Apna material upload karo — PDF, notes, YouTube — aur AI uss specific material se hi jawab deta hai!"

■ PROS

- ✓ Answers grounded in YOUR sources — no hallucinations about your content
- ✓ Generates flashcards, study guides, Q&A;, and audio podcasts
- ✓ Supports PDFs, Docs, YouTube, Audio, Web URLs as sources
- ✓ Completely free with any Google account

■■ CONS

- ✗ English-only for most features
- ✗ Higher usage limits need Google One AI Premium ($19.99/month)
- ✗ No image understanding in documents

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PRICING
Free experimental tier with Google account (modest daily limits). NotebookLM Plus: included in Google One AI Premium at $19.99/month.

Google account se FREE hai. Heavy use ke liye $20/month One AI Premium.

■ USE CASES
Students studying from PDFs, researchers digesting papers, professionals reviewing lengthy reports, anyone who wants to 'chat with their documents'.

■ Official Site: notebooklm.google

Claude (by Anthropic)

Claude (claude.ai) is Anthropic's AI assistant — considered the best for nuanced writing, long-form analysis, coding help, and document processing. Current model: Claude Sonnet 4.6.

"Writing, analysis, coding, document processing — Claude har cheez mein best hai. Bilkul natural conversation lagti hai."

■ PROS
- ✓ Exceptional long-form writing quality — more natural than GPT-4
- ✓ 200K token context window — can process entire books
- ✓ Excellent at following complex, nuanced instructions
- ✓ Strong coding and mathematical reasoning capabilities
- ✓ Artifacts feature for creating and iterating on code, docs, visuals

■■ CONS
- ✗ Free tier has message limits (resets daily)
- ✗ No real-time internet access on free tier (web search on Pro)
- ✗ Image generation not natively available (unlike ChatGPT)

■ PRICING
Free: limited daily messages. Pro: $20/month (5x more usage, priority access, Projects). Team: $30/user/month. Enterprise: custom pricing.

Free mein daily limited messages. Pro $20/month mein bohot zyada milta hai — worth it hai.

■ USE CASES
Long-form writing, document analysis, coding assistance, research, content creation, and any task requiring thoughtful, nuanced AI responses.

■ Official Site: claude.ai

Gemini 2.0 (by Google)

Gemini 2.0 is Google's flagship AI with multimodal capabilities — understanding text, images, video, and audio. Deeply integrated with Google Workspace (Docs, Sheets, Gmail).

"Google ka AI assistant — Google Workspace ke saath seamlessly kaam karta hai. Multimodal yani sab kuch samajhta hai."

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PROS

- ✓ Native integration with Google Workspace — Gmail, Docs, Sheets, Meet
- ✓ 1 million token context window — longest available
- ✓ Real-time internet search built-in
- ✓ Deep Research feature for comprehensive multi-source analysis
- ✓ Free via gemini.google.com — very generous tier

■■ CONS

- ✗ Creative writing quality slightly below Claude
- ✗ Can be overly cautious in responses
- ✗ Advanced features need Google One AI Premium

■ PRICING

Free: unlimited Gemini 2.0 Flash access. Google One AI Premium: $19.99/month (Gemini Advanced, 2.0 Pro, Workspace AI features, NotebookLM Plus).

Basic Gemini bilkul free hai. Google workspace users ke liye $20/month mein poora AI suite milta hai.

■ USE CASES

Google Workspace users, researchers needing real-time search, anyone wanting free high-quality AI, and tasks requiring very long context windows.

■ **Official Site:** gemini.google.com

08 — Bonus & Emerging AI Tools

Kuch naye aur exciting tools jo mainstream nahi hue abhi — lekin inhe aaj hi try karna chahiye. Early adopters ko bohot faayda hoga.

Higgsfield AI

Higgsfield specialises in text-to-video with precise camera movement control — choose from 40+ professional moves like crash-zoom, dolly-in, and orbital arc for cinematic outputs.

"Video mein professional camera movements control karo — jaise real filmmaker karta hai! 40+ camera moves available."

■ PROS

- ✓ 40+ professional camera movement presets (crash-zoom, dolly, orbital)
- ✓ 1080p output with physically plausible motion
- ✓ Lighter content moderation than Sora/Kling
- ✓ Excellent for cinematic B-roll and ad content

■■ CONS

- ✗ Clips currently max ~5 seconds
- ✗ Free tier adds watermark; generation queues can be long
- ✗ Early access product — features evolve rapidly

■ PRICING

Free: 25 credits/month (watermarked). Basic: $9/month (15 videos, commercial). Pro: $39/month (70 videos). Ultimate: $79/month (150 videos).

Free mein 25 credits/month. Commercial use ke liye $9/month se start.

■ USE CASES

Cinematic social media content, ad pre-vis, storyboarding complex shots, and any creator needing dramatic camera movements.

■ Official Site: higgsfield.ai

Pika Labs 2.1

Pika is the go-to tool for 'Pikaffects' — AI-powered special effects that transform objects and people in videos. Inflate, melt, explode, cake-ify — viral content machine.

"Viral videos banane ke liye best hai! Kisi cheez ko melt karo, inflate karo, cake bana do — TikTok/Instagram ke liye perfect."

■ PROS

- ✓ Unique Pikaffects — inflate, melt, explode, squish effects
- ✓ Pikadditions — add objects into existing videos
- ✓ Extremely easy interface — pick effect, upload, done
- ✓ Free Basic plan available

■■ CONS

- ✗ Inconsistent quality — results vary significantly
- ✗ Very short clips (5-10 seconds maximum)
- ✗ Not for photorealistic or cinematic content

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ PRICING

Free: 80 credits/month (~a few videos). Standard: $8/month (700 credits). Pro: $28/month (2,300 credits). Fancy: $76/month (6,000 credits).

Free mein 80 credits/month. Standard plan $8/month — social media ke liye enough hai.

■ USE CASES

Creating viral social media effects, marketing attention-grabbers, fun content creation, and product videos with creative transformations.

■ Official Site: pika.art

Grok (by xAI)

Grok is xAI's (Elon Musk's) AI assistant integrated into X (Twitter). Features real-time web search, image generation via Aurora, and notably fewer content restrictions.

"X platform ka AI — real-time information, Aurora image generation, aur koi zyada restrictions nahi! Bold content bana sakte ho."

■ PROS

- ✓ Real-time X (Twitter) data access — current trends and news
- ✓ Aurora image generation with notably fewer content restrictions
- ✓ Free for X users (basic Grok 2)
- ✓ Voice conversation mode available

■■ CONS

- ✗ Deeply integrated with X platform — not as standalone as others
- ✗ Quality slightly below Claude/GPT-4 for complex reasoning
- ✗ Premium X subscription required for Grok 3

■ PRICING

Grok 2: Free with X account. Grok 3 (best model): requires X Premium+ at $16/month or xAI API subscription.

Basic Grok X account se free hai. Grok 3 ke liye X Premium+ $16/month chahiye.

■ USE CASES

Real-time social media monitoring, viral content creation, image generation with more creative freedom, and X platform users wanting AI assistance.

■ Official Site: x.ai/grok

09 — Free Tools Quick-Reference List

Agar budget zero hai toh bhi tension nahi — yeh sab tools free mein use ho sakte hain! Really Maktoob guarantee karta hai — AI seekhne ke liye paise ki zaroorat nahi.

■ IMAGE GENERATION

- ✓ DALL-E 3 — Free via Bing Image Creator (unlimited)
- ✓ Leonardo AI — 150 tokens/24 hrs (renews daily, ~15 images/day)
- ✓ Adobe Firefly — 25 free credits/month
- ✓ DreamStudio — 25–100 free credits on signup
- ✓ Ideogram — 10 slow generations/day

■ VIDEO GENERATION

- ✓ Hailuo AI — 1,000 signup credits + 100 credits/day (~3 videos/day)
- ✓ Runway Gen-3 — 125 one-time credits on signup
- ✓ Kling AI — 66 free credits/day (~1 video/day)
- ✓ Pika Labs — 80 video credits/month
- ✓ Luma Dream Machine — ~5 free generations/day
- ✓ Higgsfield — 25 credits/month

■ AUDIO & MUSIC

- ✓ Suno AI — 50 credits/day (~10 songs/day)
- ✓ Udio — 100 credits/month (~50 songs/month)
- ✓ ElevenLabs — 10,000 characters/month (~5 min speech)
- ✓ NotebookLM Audio — Unlimited audio overviews (Google account)

■ WEBSITES & PRESENTATIONS

- ✓ Framer — Free Forever (subdomain site, 1,000 visitors/month)
- ✓ Gamma — 400 AI credits one-time signup bonus
- ✓ Napkin AI — Full features free during beta
- ✓ Tome AI — 500 AI credits on signup
- ✓ Durable — Free preview and generate (paid to publish)
- ✓ 10Web — 7-day free trial (full access)

■ CODING ASSISTANTS

- ✓ Cursor AI — 2,000 completions/month free (Hobby plan)
- ✓ Windsurf — Unlimited completions + 5 Flow actions/day
- ✓ GitHub Copilot — Limited free tier for students/OSS maintainers
- ✓ Bolt.new — Daily free token allowance

© 2025 Really Maktoob — AI Masterclass Resource PDF — All Rights Reserved

■ AI ASSISTANTS & RESEARCH

- ✓ Claude — Daily free message limit (claude.ai)
- ✓ ChatGPT — Free access to GPT-4o (with limits)
- ✓ Gemini — Free unlimited Gemini 2.0 Flash (google.com)
- ✓ Grok — Free with X account (Grok 2)
- ✓ Perplexity — Unlimited basic search + 5 Pro searches/day
- ✓ NotebookLM — Free with Google account

■ Pro Tip: Sabse pehle free plans se shuru karo. Jab ek tool mein comfortable ho jao, tab paid plan consider karo. Bohot saare free tiers regular use ke liye kaafi hain!
